

For PA slides (current work slide)

Cosmed: there are about 430 residents nearby Cosmed but the facility's risk has significantly reduced risk since the installation of controls.

ACS: there are only about 2 residences in the area but the facility is in the midst of installing controls by late September/early October 2022 to reduce the risk.

Braun: was originally one of the higher risk facilities in Region 3, however, the facility installed controls in 2020 and has significantly decreased risk from original estimates.
